(54) Title: IMPROVED JOINERY SYSTEM

(57) Abstract: A joinery assembly which includes a fixed panel form (32) is adapted to receive and locate a fixed panel (33), where at least a portion of the exposed surfaces of the fixed panel form are covered by a cladding material (39). The joinery system also includes a movable panel forms (34a, 34b), each adapted to receive a movable panel such as a sliding panel (35a) and/or a hinged panel (35b) respectively, where each of the movable panels has an interior surface and an exterior surface. At least a portion of the interior surface of a movable panel received by a movable panel form is covered by the cladding material applied to the exposed surfaces of the fixed panel form.
